

Aspire to be exceptional

What do successful organizations of the future have in common? An aspiration to be exceptional in innovation and service delivery, while improving upon the efficiency they deliver. They achieve these ambitions by leveraging VMware technologies to be ahead of the curve today and tomorrow.

In today's competitive IT marketplace being average isn't enough. While the appetite for outstanding VMware practitioners grows at all levels, evolving with the industry requires continuous professional development, driven by your aspiration to be exceptional.

Who is VMware Certification for?

Our program includes certifications for

- Architects • Engineers • Administrators
- Governance & Operations • Developers

Distinguish yourself

You know that being the best isn't just about executing deployments and managing technology efficiently, accurately and cost-effectively. You also understand that it's about immersing yourself in technology so you can take control and deliver to the fullest potential right across your business.

With VMware Certification we don't just train you to design, install or manage IT. We empower you with a thorough understanding of its transformative capabilities at all levels. Our program is uniquely designed to provide the bleeding edge thinking and advanced know-how to employ IT as your strategic business enabler. With all the skills you need to create, operate and maintain an IT environment that flexes and adapts wherever the future leads, there is no limit to your career success.

Transform your future

We have enhanced VMware Certification with new programs that make it easier and faster to acquire exceptional skills. We leave nothing to chance in advancing your career aspirations with role-based training that ensures both theory and practical skills are aligned to your real world responsibilities.

Accelerate your learning

A revitalized curriculum structure fast-tracks your learning. Simply choose the level that reflects your current status and move forward from there. For your business that means less time away from your job; for you it means faster career progression.

How does it work?

Simply choose your current level of certification – associate, professional, advanced professional or expert – and the solution track you want to study – data center virtualization, cloud, end user computing or network virtualization. Align these to your role – engineer, architect, governance and operations, or administrator – and begin realizing your aspirations. Once you have successfully obtained your certification you can move on to the next level.

Why VMware Certification?

- **Industry recognition** – VMware Certification is well regarded in the industry as a true reflection of competence
- **Career progression** – faster, simplified structure accelerates learning and advances your career aspirations
- **Real world approach** – VCAP exams are 100% hands-on testing
- **Tailored learning** – role-based courses ensure you learn what you really need to know
